AUTHOR INDEX

Boeyens, J.C.A., 3
Brandt, P., 79

Comba, P., 3

Deeth, R.J., 11

Hambley, T.W., 35
Hancock, R.D., 1, 61
Hay, B.P., 61

Jones, A.R., 35

Norrby, P.-O., 79

Reichert, D.E., 111

Welch, M.J., 111

Zimmer, M., 133

PII: S0010-8545(00)00416-1

COORDINATION CHEMISTRY REVIEWS, VOL. 212 (2001)

SUBJECT INDEX

Amide
The role of donor group orientation as a factor in metal ion recognition by ligands 61
Amine
The role of donor group orientation as a factor in metal ion recognition by ligands 61
Anti-cancer complexes
Molecular mechanics modelling of Pt/nucleotide and Pt/DNA interactions 35

Cambridge Structural Database
Molecular mechanics, data and conformational analysis of first-row transition metal complexes in the Cambridge Structural Database 133
Cisplatin
Molecular mechanics modelling of Pt/nucleotide and Pt/DNA interactions 35
Complementarity
The role of donor group orientation as a factor in metal ion recognition by ligands 61
Coordination chemistry
Deriving force field parameters for coordination complexes 79
Coordination scan
Applications of molecular mechanics to metal-based imaging agents 111

Drug design
Molecular mechanics modelling of Pt/nucleotide and Pt/DNA interactions 35

Electronic effects
The ligand field molecular mechanics model and the stereoelectronic effects of d and s electrons 11
Ether
The role of donor group orientation as a factor in metal ion recognition by ligands 61

Force field
Molecular mechanics: theoretical basis, rules, scope and limits 3
Force fields
Deriving force field parameters for coordination complexes 79

Gadolinium
Applications of molecular mechanics to metal-based imaging agents 111
Gallium
Applications of molecular mechanics to metal-based imaging agents 111

Indium
Applications of molecular mechanics to metal-based imaging agents 111

Ligand design
The role of donor group orientation as a factor in metal ion recognition by ligands 61

Metal complexes
Molecular mechanics, data and conformational analysis of first-row transition metal complexes in the Cambridge Structural Database 133
Metal ions
The role of donor group orientation as a factor in metal ion recognition by ligands 61
Molecular mechanics
Deriving force field parameters for coordination complexes 79
Molecular mechanics, data and conformational analysis of first-row transition metal complexes in the Cambridge Structural Database 133

PII: S0010-8545(00)00417-3

Molecular mechanics modelling of Pt/nucleotide and Pt/DNA interactions 35
Molecular mechanics: theoretical basis, rules, scope and limits 3
The role of donor group orientation as a factor in metal ion recognition by ligands 61
Molecular modeling
Molecular mechanics: theoretical basis, rules, scope and limits 3
Molecular modelling
The ligand field molecular mechanics model and the stereoelectronic effects of d and s electrons 11

Parameterization
Deriving force field parameters for coordination complexes 79
Preorganisation
The role of donor group orientation as a factor in metal ion recognition by ligands 61
Strain energy
Molecular mechanics: theoretical basis, rules, scope and limits 3
Structure
Molecular mechanics: theoretical basis, rules, scope and limits 3
SYBYL parameters
Applications of molecular mechanics to metal-based imaging agents 111

Technetium
Applications of molecular mechanics to metal-based imaging agents 111
Transition metal complexes
The ligand field molecular mechanics model and the stereoelectronic effects of d and s electrons 11
Transition metals
Deriving force field parameters for coordination complexes 79
